* For KX-TD816/1232 users, some features numbers can be changed by System Programming. Consult with your dealer for more details.
Cautions

• The apparatus is designed to be installed and operated under controlled conditions of ambient temperature and a relative humidity not greater than 60%.

• Avoid installing the apparatus in damp or humid environments, such as bathrooms or swimming pools.

• 999 or 112 can be dialled on the apparatus after accessing the CO line for the purpose of making outgoing calls to the BT emergency service.

• During dialling, this apparatus may tinkle the bells of other telephones using the same line. This is not a fault and we advise you not to call Fault Repair Service.

• If the apparatus does not operate properly, disconnect the unit from the extension line cord and then connect again.

• Power failure transfer
  Even if the KX-T7400 series are connected to telephone line, they will not operate during a power failure.

Others:

• If there is any trouble, unplug the extension line and connect a known working phone. If the known working phone operates properly, have the defective phone repaired by one of the specified Panasonic Factory Service Centres. If the known working phone does not operate properly, check the Digital Super Hybrid System and the Internal extension wiring.

• Keep the unit away from heating appliances and electrical noise generating devices such as fluorescent lamps and motors.

• The unit should be kept free of dust, moisture and vibration, and should not be exposed to direct sunlight.

• Do not use benzine, thinner, or the like, or any abrasive powder to clean the cabinet. Wipe it with a soft cloth.

• Do not use any handset other than a Panasonic handset for model KX-T7400 series use.
• KX-T7400 series are capable of being used in conjunction with hearing aids fitted with inductive coil pick-ups. The handset should be held as for normal conversation. For operation the hearing aid should be set to it’s “T” position or as directed in the operating instructions for the hearing aid.

• KX-T7400 series are designed to aid the visually handicapped to locate dial keys and buttons.

• KX-T7400 series cannot be connected to the public telecommunications network. Connecting the KX-T7400 series to the public telecommunications network is prohibited by law.
